

Vp's Nature and Climate Project Support

Vp's aim is to have a net positive impact on the natural world. To address the inevitable negative environmental consequences of business, Vp are proud to sponsor some of the best examples of nature conservation projects around the UK which showcase our island's ecosystem diversity. To maximise colleague involvement with these projects and the wider natural world, we select projects around the whole of the UK to give all colleagues a chance to participate and support with their time.

AGRICULTURAL ADVICE TRAINING

Habitat: Farmland

The Wildlife Trusts are leading on a programme to [upskill their land advisors](#) on agricultural issues to better help the food producers they work with.

SAND DUNE RESTORATION

Habitat: Coastal

Dunes are critical for many wildlife and as flood defences. Lancashire Wildlife Trust continue to have great success in expanding the [Fylde Sand Dunes](#).
